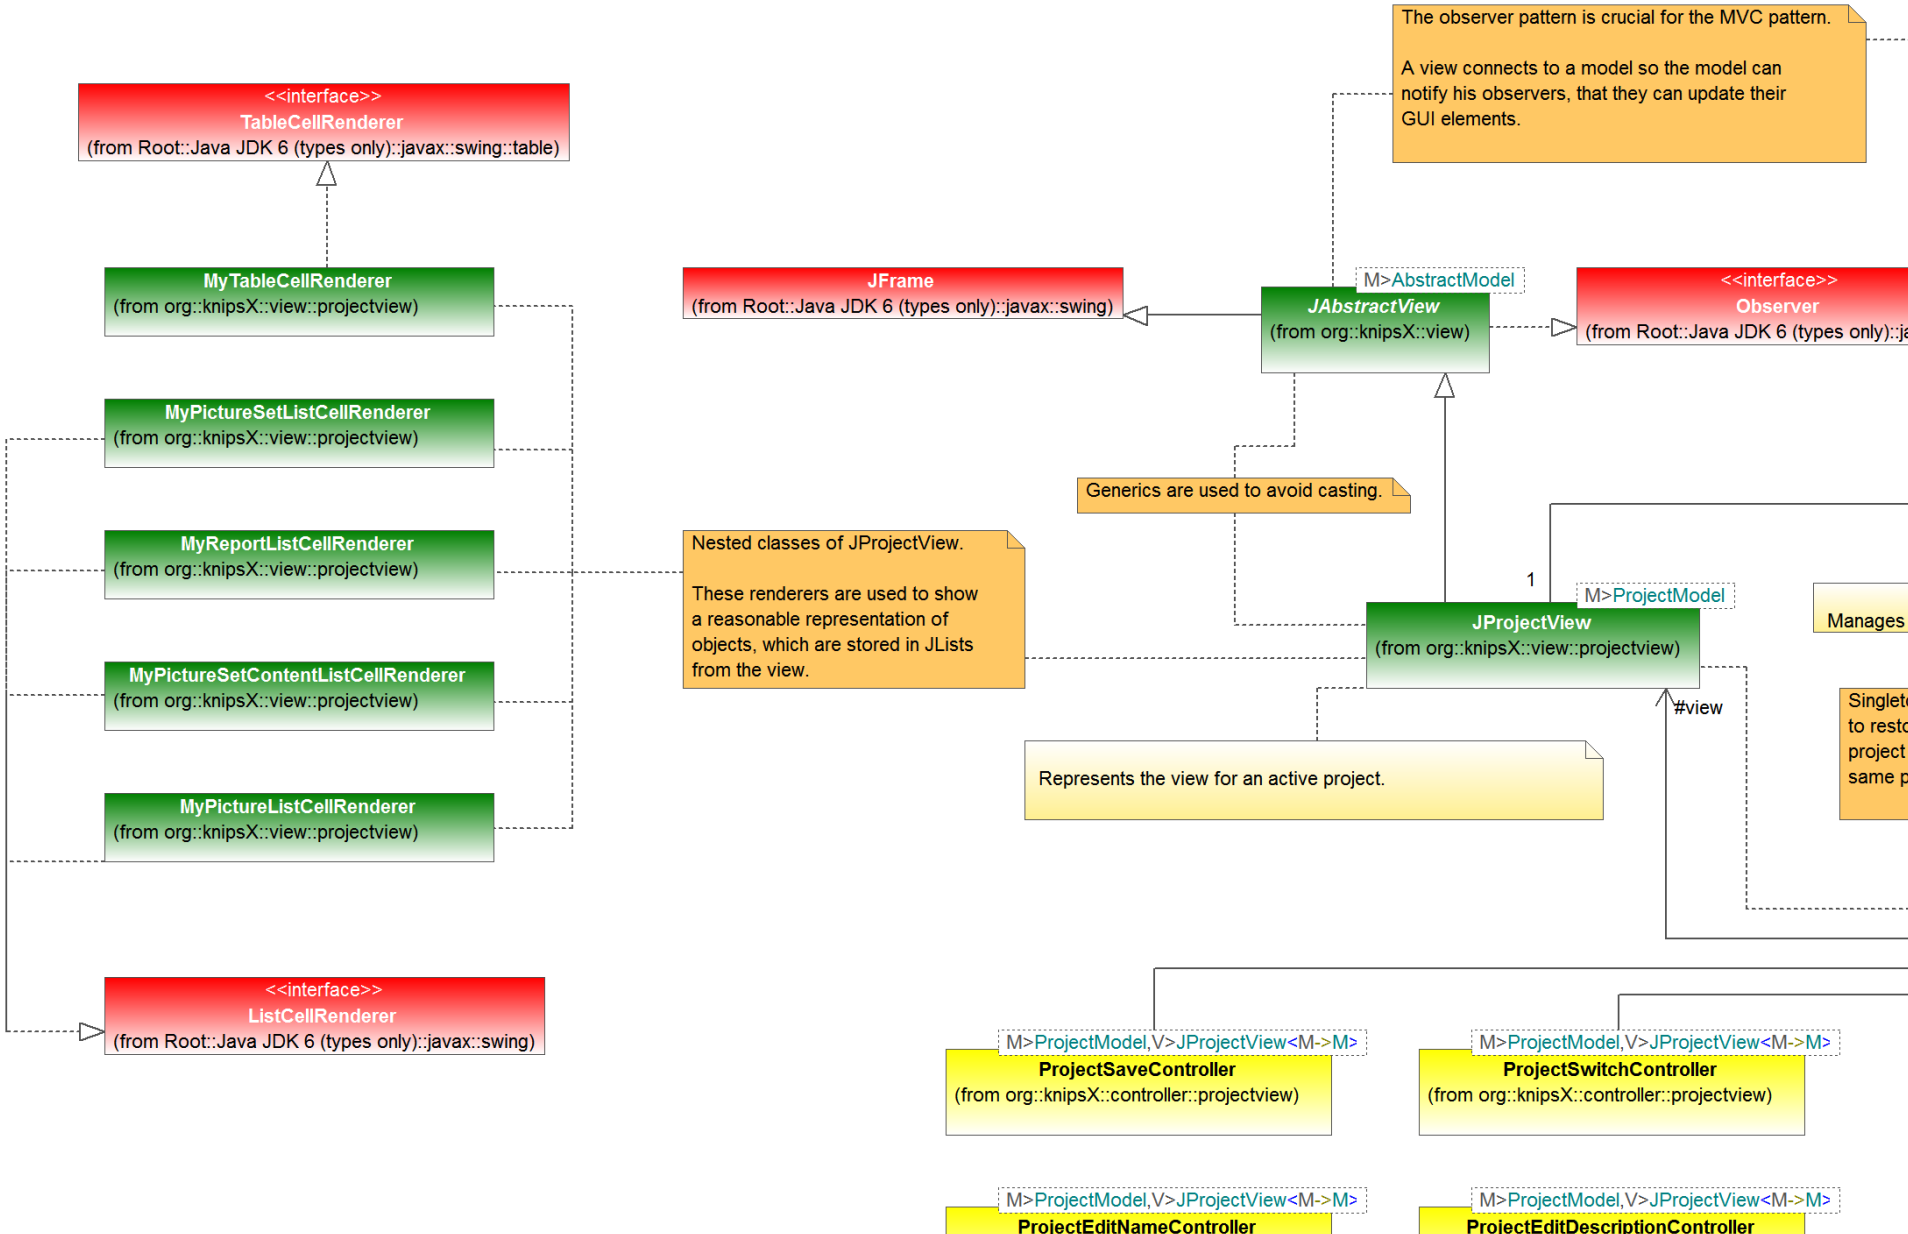
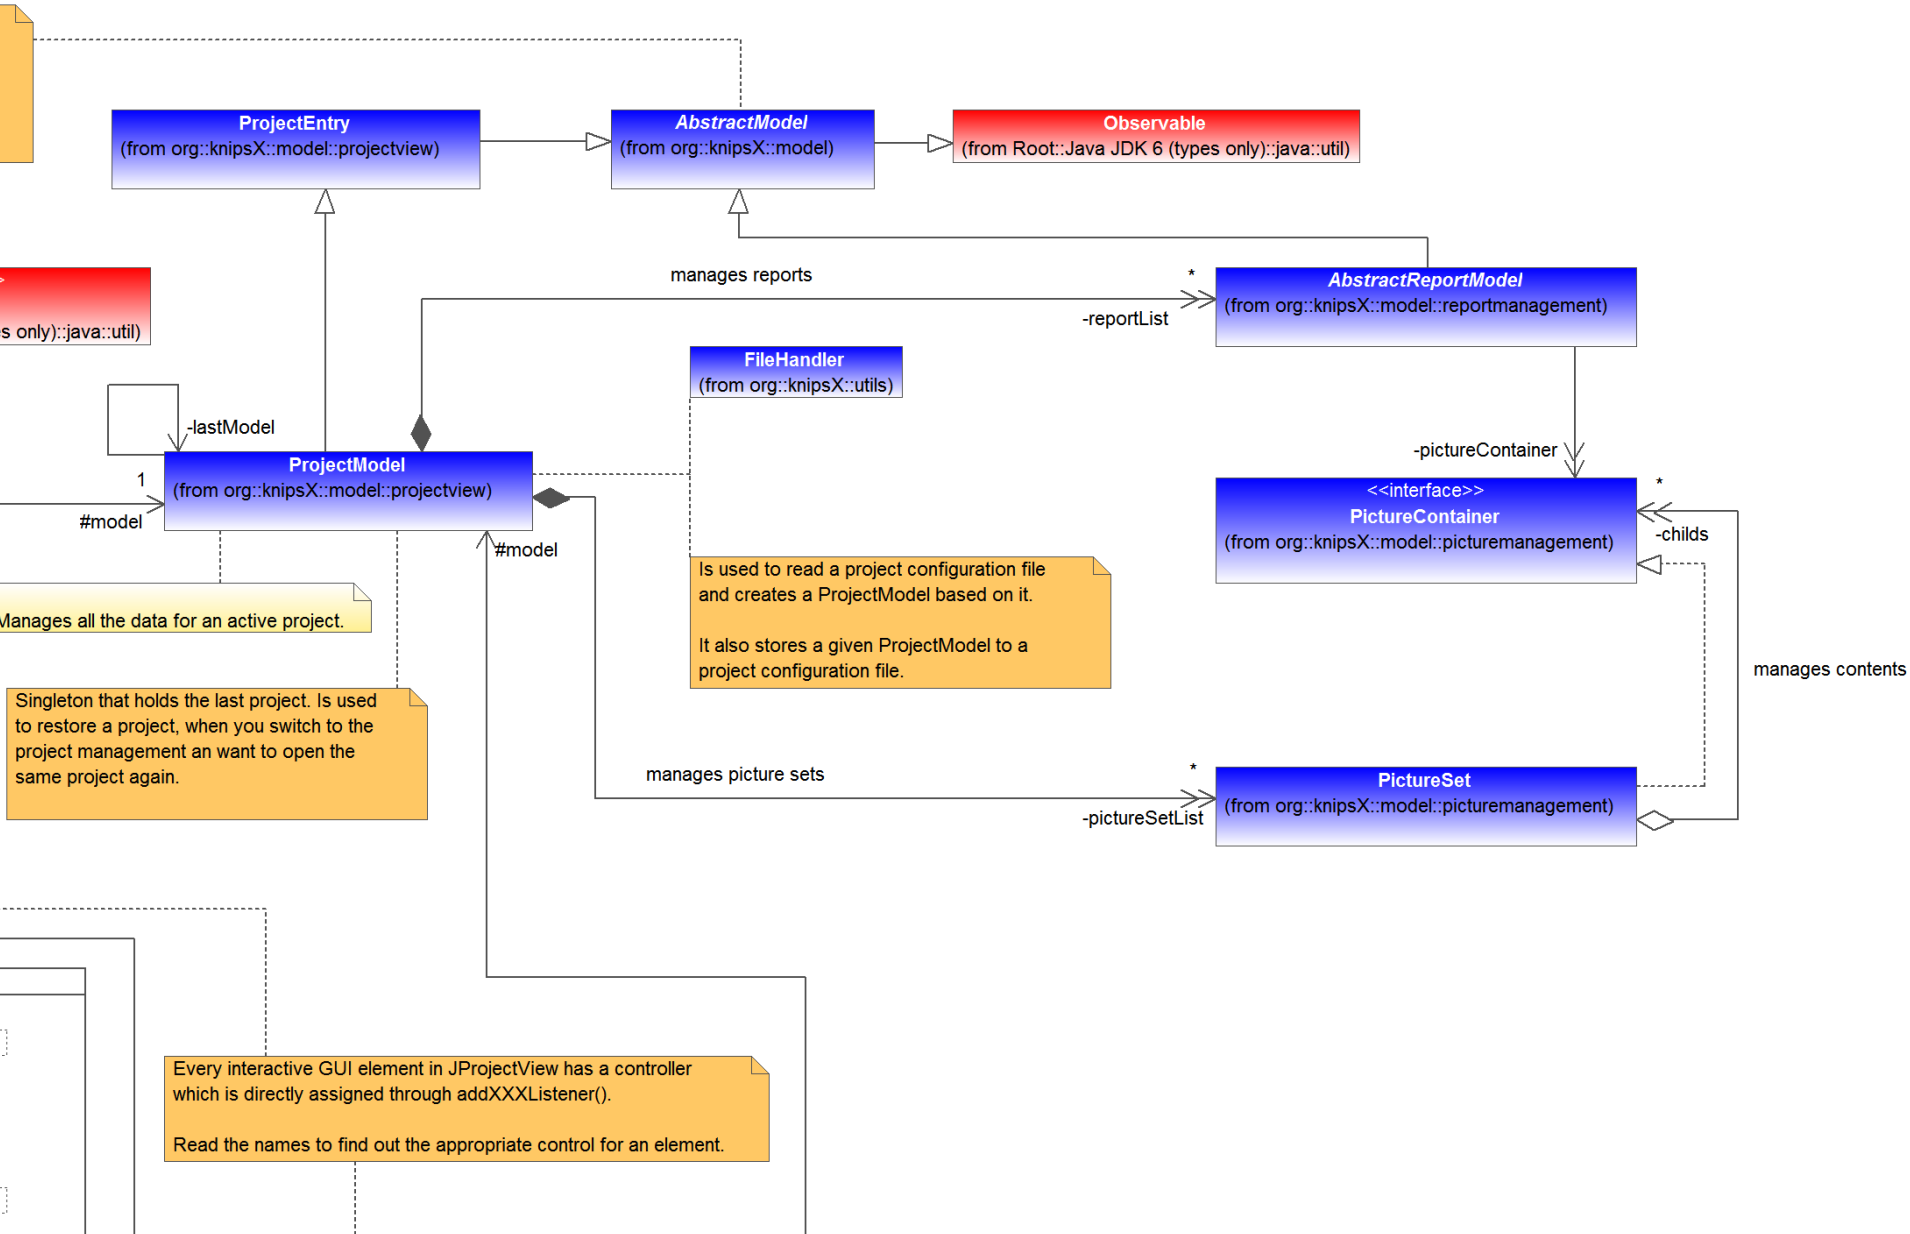
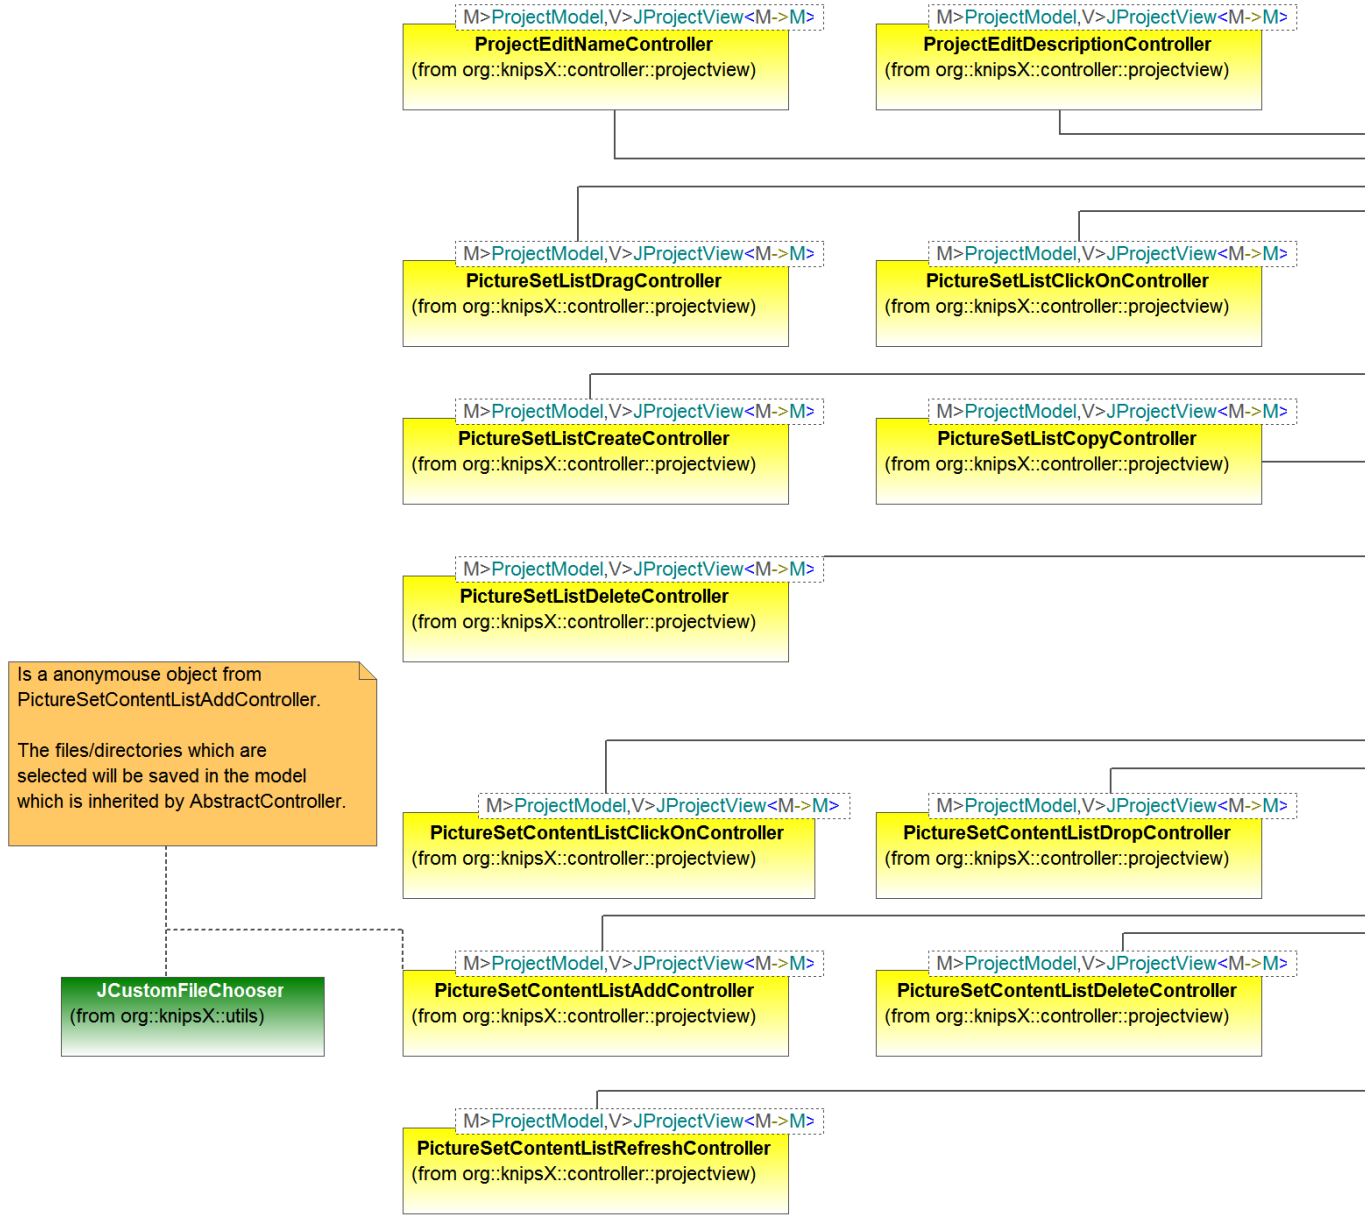
MVC for the project view





ProjectEntry
(from org::knipsX::model::projectview)
AbstractModel
(from org::knipsX::model)
Observable
(from Root::Java JDK 6 (types only)::java::util)
s only)::java::util)
manages reports
*
-reportList
AbstractReportModel
(from org::knipsX::model::reportmanagement)
FileHandler
(from org::knipsX::utils)
-lastModel
1
#model
ProjectModel
(from org::knipsX::model::projectview)
#model
-pictureContainer
*
<<interface>>
PictureContainer
(from org::knipsX::model::picturemanagement)
-childs
manages contents
Manages all the data for an active project.
Is used to read a project configuration file and creates a ProjectModel based on it.
It also stores a given ProjectModel to a project configuration file.
Singleton that holds the last project. Is used to restore a project, when you switch to the project management an want to open the same project again.
manages picture sets
*
-pictureSetList
PictureSet
(from org::knipsX::model::picturemanagement)
Every interactive GUI element in JProjectView has a controller which is directly assigned through addXXXListener().
Read the names to find out the appropriate control for an element.



M>ProjectModel,V>JProjectView<M->M>
ProjectEditNameController
(from org::knipsX::controller::projectview)
M>ProjectModel,V>JProjectView<M->M>
ProjectEditDescriptionController
(from org::knipsX::controller::projectview)
M>ProjectModel,V>JProjectView<M->M>
PictureSetListDragController
(from org::knipsX::controller::projectview)
M>ProjectModel,V>JProjectView<M->M>
PictureSetListClickOnController
(from org::knipsX::controller::projectview)
M>ProjectModel,V>JProjectView<M->M>
PictureSetListCreateController
(from org::knipsX::controller::projectview)
M>ProjectModel,V>JProjectView<M->M>
PictureSetListCopyController
(from org::knipsX::controller::projectview)
M>ProjectModel,V>JProjectView<M->M>
PictureSetListDeleteController
(from org::knipsX::controller::projectview)
Is a anonymouse object from
PictureSetContentListAddController.
The files/directories which are
selected will be saved in the model
which is inherited by AbstractController.
M>ProjectModel,V>JProjectView<M->M>
PictureSetContentListClickOnController
(from org::knipsX::controller::projectview)
M>ProjectModel,V>JProjectView<M->M>
PictureSetContentListDropController
(from org::knipsX::controller::projectview)
JCustomFileChooser
(from org::knipsX::utils)
M>ProjectModel,V>JProjectView<M->M>
PictureSetContentListAddController
(from org::knipsX::controller::projectview)
M>ProjectModel,V>JProjectView<M->M>
PictureSetContentListDeleteController
(from org::knipsX::controller::projectview)
M>ProjectModel,V>JProjectView<M->M>
PictureSetContentListRefreshController
(from org::knipsX::controller::projectview)
