Picturemanagement

Iterator ought to iterate over Picture

E

<<interface>>
Iterator
(from Root::Java JDK 6 (types only)::java::util)

<<interface>>
PictureContainer
(from org::knipsX::model::pictu

-childs

*

Composite pattern

Picture
(from org::knipsX::model::picturemanagement)

+pictures

*

Directory
(from org::knipsX::model::picturemanagement)

PictureSet
(from org::knipsX::model::picturemanagement)

Picture uses the ExifAdapter to get all Exifparameter

ExifAdapter
(from org::knipsX::utils::exifAdapter::jexifviewer)

The ExifAdapter adapst all funktions of jexifviewer

<<namespace>>
jexifviewer
(from org::knipsX::utils::exifAdapter)

The jexifviewer reads the exifparameter from a jpeg file header

JPEG File: This represents a JPEG File
